

**A comprehensive range of environmentally
friendly products for colouring, finishing and
maintaining parquet and plank flooring**

 **DevoNatural[®]**

PROFESSIONAL PARQUET PRODUCTS

DevoNatural stands out in every way

When DevoNatural develops a new product, it will always meet all specific needs as to the finishing of parquet and plank flooring.

For every type of product, “**varnish, oil, wax or soap**”, DevoNatural always strives to achieve the highest possible results, in terms of protecting the environment, wear resistance, resistance to chemical products, colour stability, UV resistance, hardness, elasticity, etc. DevoNatural also attaches particular importance to ensuring that the product is easy to apply and dries as rapidly as possible. In addition, DevoNatural developed an appropriate maintenance product for each type of finish.

A great deal is expected of finishing products for parquet floors, compared to other wood finishing products. It goes without saying that parquet floors are heavily used every day and have to be extremely resistant...

A DevoNatural treated parquet floor, properly maintained, is guaranteed to be highly resistant for many long years.

The philosophy behind DevoNatural products

The DevoNatural range of professional parquet floor products meets the highest standards when it comes to treating parquet floors.

It is all about quality without compromise, developing products using the best raw materials and cutting-edge technologies.

DevoNatural is available in original colours and contemporary finishes, which are fully in harmony with the latest trends in interior design.

Varnish, oil, wax or soap for parquet floors?

How to choose the ideal DevoNatural finish for your wooden floor!

Wooden floors can be treated in different ways. The method that you choose will determine the look, lifespan, comfort and how your floor needs to be maintained.

Oil creates a natural matt aspect but requires a little more maintenance. A varnished parquet floor needs less maintenance and is better protected in the long term. Last but not least, wax gives the parquet floor natural protection, while the soaping method is very fashionable in the Scandinavian countries.

With this in mind, the table of the different DevoNatural products will help you to make the right choice.

DevoNatural comparison table

Oil	Natural appearance	Wear resistance	Stain resistant	Chemical resistant	Can be retouched without sanding
DevoNatural High Solid Oil	★★★★★	★★	★★★	★★★	★★★★★
+ Extra Hardener	★★★★★	★★★	★★★★	★★★★	★★★★

Note: Product combinations, colour effects and sanding/application method will determine the final natural appearance.
The wear resistance of oiled parquet floors is determined mainly by the density and hardness of the type of wood used.

Varnish/lacquer	Natural appearance	Wear resistance	Stain resistant	Chemical resistant	Can be retouched without sanding
DevoNatural Finish	★★★★	★★★	★★★★	★★★	★★
DevoNatural Transit	★★★★	★★★★	★★★★★	★★★★	★
DevoNatural Passage	★★★★★	★★★★★	★★★★★	★★★★★	★

Note : Product combinations and the shine of the final coat will determine the final natural appearance.

Wax	Natural appearance	Wear resistance	Stain resistant	Chemical resistant	Can be retouched without sanding
DevoNatural Solid Wax	★★★★	★★	★★	★★	★★★★★

Wood Soap	Natural appearance	Wear resistance	Stain resistant	Chemical resistant	Can be retouched without sanding
DevoNatural Soap on resinous wood	★★★★★	★★	★★	★★	★★★★★
DevoNatural Soap on hardwood	★★★★★	★★	★	★	★★★★★

★★★★★ = outstanding

★★★★ = very good

★★★ = good

★★ = less effective

★ = difficult

- **DevoNatural High Solid Oil** is mainly applied for bedrooms, living rooms, decking, etc. where floors are only subject to moderate use. It is also suitable for garden furniture. Combined with **DevoNatural Extra Hardener**, it can also be applied in bathrooms, shops, showrooms, bars, cafés, restaurants, etc.

Oil

DevoNatural High Solid Oil gives you an extremely natural look in only one single layer.

In addition to colourless oil, you can choose from a wide range of contemporary colours, which can also be combined with the **DevoNatural Reactive** aging product.

Oil greatly accentuates the natural appearance of the wood. Any subsequent scratches will be less visible, but floors with an oil finish require more maintenance and are less resistant to stains than varnished floors.

However, **DevoNatural High Solid Oil** clearly stands out in terms of comfort, adding **DevoNatural Extra Hardener** to **DevoNatural High Solid Oil**, will further improve wear resistance and reduce drying time!

In order to compare products, please see the table - page 7.

Maintenance:

- Weekly cleaning using a floor cloth, water and **DevoNatural Wood Soap**.
- Once or twice per year, treat thoroughly with **DevoNatural Intensive Cleaner** and **Renewer**.
- Advantage of oil: it is always possible to remove small marks and stains, by lightly sanding and re-oiling the floor.

Please refer to the maintenance sheet for parquet floors treated with **DevoNatural High Solid Oil**.

Varnish/lacquer

Wear resistant DevoNatural parquet varnishes make the pores in the wood fully impermeable to moisture and grime.

DevoNatural parquet varnish makes your floor water-repellent and highly resistant to wear, as well as chemical agents. You can choose between three types of varnish for parquet floors, each of which have specific properties.

In order to compare products, please see the table - page 7.

Maintenance:

- If necessary, clean with **DevoNatural Soft Cleaner**.
- For additional protection, treat your floor with **DevoNatural Polish**, which will extend the lifespan of the finish coat.

Please refer to the maintenance sheet for parquet floors sealed with **DevoNatural Finish**, **Transit** or **Passage**.

- **DevoNatural Finish** is mainly applied for bedrooms, living rooms, etc., where floors are subject to moderate use.
- **DevoNatural Transit** is mainly applied for living rooms, shops, offices, showrooms, etc., where floors are subject to moderate or heavy use.
- **DevoNatural Passage** is mainly applied for living rooms, shops, entrance halls, showrooms, hotels, banks, museums, public buildings, airports, theatres, etc., where floors are heavy or very heavily used!

- **DevoNatural Solid Wax** is mainly applied for living rooms, museums, prestigious projects, with parquet floors including design motifs, and for restoring parquet floors that were waxed before.

Wax

DevoNatural Solid Wax gives your floor a natural finish. Ideal for treating antique parquet floors, etc.

Recognisable because of its special odour, **DevoNatural Solid Wax** gives your floor a deep and natural shine. A waxed parquet floor is less resistant than an oiled or varnished parquet floor - and certainly if it is subject to heavy use. But it can easily be repaired without sanding!

In order to compare products, please see the table - page 7.

Maintenance:

- Regularly wax areas where people frequently walk.
- It is advised to regularly use a domestic floor polisher.
- Once or twice per year, treat thoroughly with **DevoNatural Liquid Wax**, which cleans and nourishes your floor.

Please refer to the **DevoNatural Solid Wax** technical data sheet.

Wood soap

Soaping your floor gives it a very soft and natural appearance. This method is highly popular in the Scandinavian countries.

Developed for floor cleaning **DevoNatural Soap** is also used, in its concentrated state, as a basic floor treatment. Especially when applied to resinous woods (pine, pitch pine, larch, etc.), **DevoNatural Soap** provides similar protection to that provided by **DevoNatural Solid Wax**, when applied to the floor in concentrated form.

The soaping method can also be used on oak floors. It usually follows pre-treatment with another product, such as **DevoNatural Reactive**. Soap provides less protection on oak, but this solution is sometimes chosen for its attractive results..

A soaped floor has a distinctive and natural appearance. In order to maintain this effect, it needs to be treated regularly with the same soap.

In order to compare products, please see the table - page 7.

- **DevoNatural Soap** is applied to resinous floors, in a wide range of situations. It is used more frequently on oak floors than for interior design and can also be used to obtain an “aged” effect.

Contemporary odourless water-based colour stain for parquet and wooden floors

DevoNatural Colour is particularly recommended as an easy way of adding a contemporary colour to parquet and wooden floors, furniture, internal doors, etc. Suitable only for indoor use.

Available colours: ceruse white, grey shadow, antique oak, smoked grey, jatoba, dark oak, ebony, walnut and castle grey.

- Fast-drying;
- 9 contemporary colours;
- Environment-friendly;
- Solvent-free.

Colour

“Bring colours to life” with DevoNatural Colour

A coloured and odourless water-based wood stain – an outstanding product!

Add colour to your floor in an environment-friendly way! Use water-based **DevoNatural Colour**!

Colour effects can be finished with all DevoNatural finish products. The vast range of **DevoNatural Colour** stains combine traditional wood and contemporary colours to meet all the modern needs.

Ceruse white

Walnut

Antique oak

Castle grey

Smoked grey

Dark oak

Grey shadow

Jatoba

Ebony

Reactive aging product with smoked effect for oak parquet and wooden floors, doors, windows, furniture, etc.
Environment-friendly hexahydrate formula. Free of harmful/irritant substances and ammonia!

Apply only to oak! DevoNatural Reactive is a reactive aging product available in 3 concentrations: 400, 600 and 1200. The higher the concentration, the more powerful the reactive aging will be. When used on oak, **DevoNatural Reactive** makes the wood age naturally. The effect can vary, depending on where the wood was grown, as well as the type and diversity of the oak. The tannic acid levels in the oak determine the chromatic effect!

- Environment-friendly, bio-degradable;
- Pleasant to use, no dangerous substances!
- Fast and easy application;
- Unique aged effects.

Reactive

“Unique aged effects” with DevoNatural Reactive

Add years to your oak parquet floor – in one single step!

Aging oak parquet floors is not a new idea. In the past, this was achieved by using dangerous products, such as hydrogen peroxide, caustic soda, ammonia, etc., which was always a delicate operation... Using the appropriate method to apply **DevoNatural Reactive** makes the task of artificially aging oak less onerous, far easier and more environment-friendly!

Finish

Transit

Passage

- **DevoNatural Finish** is mainly applied for bedrooms, living rooms, etc., where floors are subject to moderate use.
- **DevoNatural Transit** is mainly applied for living rooms, shops, offices, showrooms, etc., where floors are subject to moderate or heavy use.
- **DevoNatural Passage** is mainly applied for living rooms, shops, entrance halls, showrooms, hotels, banks, museums, public buildings, airports, theatres, etc., where floors are heavy or very heavily used!

DevoNatural "stain and wear resistant varnishes for parquet floors"

The right DevoNatural varnish for your every need!

DevoNatural Finish, Transit and Passage varnishes each have their own specific properties. The product table will help you choose the most suitable DevoNatural varnish for "your" parquet floor or staircase.

Decades of research, development, experience and using high quality raw materials provide DevoNatural varnishes with the maximum comfort and durability.

Wear resistant bleaching matt varnish, aqueous polyurethane-acrylic based, for parquet and wooden floors, with UV filter and tannin inhibitor.

This anti-yellowing, elastic and sealant water-based interior finish gives unstained wooden floors a “natural wood colour” and adds a “faded” appearance to darker wood types and wooden floors stained using **DevoNatural Colour**. Indoors, **DevoNatural Finish Bleaching Matt** can also be applied to wooden doors, furniture, ceilings, etc. For wooden floors, only apply the product on chamfered parquets and conventional wooden floors. The “faded” appearance depends on the tannic acid content of the wood. Do not use on merbau!

- Fast drying;
- Wood does not discolour;
- UV filter, anti-yellowing;
- Tannin inhibitor prevents tannic acid bleeding;
- Solvent-free;
- No unpleasant odours.

Finish

**Colour
Effect**

Bleaching Matt

Finish

Matt Oiled Look

Wear resistant colourless matt varnish, aqueous polyurethane-acrylic based, with UV filter.

This water-based interior finish hardly changes the colour of the wood. It is elastic, sealant and gives unstained wooden floors a “matt oiled” look. In addition, it can also be used on practically all wood types, and parquet floors that have been stained using **DevoNatural Colour**.

Indoors, **DevoNatural Finish** Matt Oiled Look can also be applied to wooden doors, furniture, ceilings, etc.

- Fast drying;
- Seamless finish;
- Hardly changes the colour of the wood;
- Easy to use;
- UV filter, anti-yellowing;
- Solvent-free;
- No unpleasant odours.

Wear resistant Greying Matt varnish, aqueous polyurethane-acrylic based, for parquet and wooden floors, with UV filter and tannin inhibitor

This anti-yellowing, elastic and sealant water-based interior finish gives unstained wooden floors a natural grey appearance and adds a “faded” look to darker wood types and wooden floors stained using **DevoNatural Colour**. Indoors, **DevoNatural Finish** Greying Matt can also be applied to wooden doors, furniture, ceilings, etc. For wooden floors, only apply the product to bevelled parquet and conventional wooden floors. The “faded” appearance depends on the tannic acid content of the wood. Do not use on merbau wood!

- Fast drying;
- Stunning greying effect on wood;
- UV filter, anti-yellowing;
- Tannin inhibitor prevents tannic acid bleeding;
- Solvent-free;
- No unpleasant odours.

Finish

**Colour
Effect**

Greying Matt

Finish

Satin

Colourless water-based satin varnish, wear resistant, polyurethane-acrylic based, with UV filter

This water-based interior finish hardly changes the colour of the wood. It is elastic, sealant and gives all unstained wooden floors and various types of unstained parquet a “natural soft silk-like sheen”. The product can also be used on practically all wood types, and parquet floors that have been stained using **DevoNatural Colour**.

Indoors, **DevoNatural Finish Satin** can also be applied to wooden doors, furniture, ceilings, etc.

- Fast drying;
- Seamless finish;
- Hardly changes the colour of the wood;
- Easy to use;
- UV filter, anti-yellowing;
- Solvent-free;
- No unpleasant odours.

Transit

Matt

Dual component aqueous varnish for parquet floors, polyurethane-acrylic based, very wear resistant

Particularly suitable for treating wooden floors that are heavily used and need to keep their natural appearance. Because of its high wear resistance and easy maintenance, this matt varnish for parquet floors is the ideal solution for a contemporary application on floors, both in the home and in business premises. Indoors, the product can also be applied to wooden doors, furniture, worktops, ceilings, etc.

- Very wear resistant;
- Suitable for business premises, staircases and heavily used surfaces;
- Resistant to most chemical products;
- The wood keeps its natural colour (little discolouring);
- Fast hardening;
- Can be used with other products. Adheres to all other DevoNatural parquet varnishes and **DevoNatural Colour**.

**Dual component varnish for
“extremely wear resistant”
parquet floors and stairs, made
from aqueous polyester-
polyurethane dispersions**

Particularly suitable for treating wooden floors that are heavily used. Because of its high wear resistance and easy maintenance, this parquet floor varnish is the ideal solution for contemporary use on floors, both in the home and in business premises. The product can also be applied indoors on wooden doors, furniture, worktops, ceilings, etc.

- **Extremely wear resistant;**
- Suitable for business premises, staircases and heavily used surfaces;
- Resistant to most chemical products;
- The wood keeps its natural colour (no discolouring);
- Fast curing;
- Can be used with other products. Adheres to all other DevoNatural parquet varnishes and **DevoNatural Colour**.

Passage

Matt

Passage

Ultra Matt

Dual component varnish for “extremely wear resistant” parquet floors and stairs, made from aqueous polyester-polyurethane dispersions.

Particularly suitable for treating wooden floors that are heavily used, but need to keep their natural and untreated appearance. Because of its high wear resistance and easy maintenance, this varnish for ultra matt parquet floors is the ideal solution for adding a contemporary look floors, both in the home and in business premises. Indoors, the product can also be applied to wooden doors, furniture, worktops, ceilings, etc.

The wood's appearance and sheen will hardly change at all after it is finished with DevoNatural Passage!

- **Exceptionally low gloss (3 GU) ;**
- Extremely wear resistant;
- Suitable for business premises, staircases and heavily used surfaces;
- Resistant to most chemical products;
- The wood keeps its natural colour (no discolouring);
- Fast curing;
- Can be used with other products. Adheres to all other DevoNatural parquet varnishes and **DevoNatural Colour**.

"Maintenance products" for DevoNatural parquet floor varnishes

The guarantee for a long life of your parquet floor!

Our **DevoNatural Soft Cleaner** and **Polish** maintenance products enable you to keep your parquet floor "stain free" for longer. A combination of DevoNatural maintenance products will make it easier to take care of your floor, as they have been specially formulated for DevoNatural parquet floor varnishes.

Please refer to the maintenance sheet for parquet floors sealed with **DevoNatural Finish, Transit** or **Passage**.

- If you have used a DevoNatural varnish to finish your parquet floor: This means you opted for a stain and wear resistant finish! Floors treated in this way are fully protected against penetration of moisture and grime. Using **DevoNatural Transit** and **Passage** even makes them resistant to a wide range of chemical products!

Soft Cleaner

Cleaner for regular maintenance of varnished parquets, bamboo, cork, vinyl and laminate floors. Does not leave any residues.

Soap for cleaning and maintaining sealed/varnished parquet, wood, bamboo, cork, vinyl and laminate floors. **Do not use on waxed or oiled floors!**

- Developed according to DevoNatural's environmental standards;
- Kind to the skin;
- Pleasant odour;
- Fast drying.

Special characteristics: DevoNatural Soft Cleaner cleans, degreases and protects the natural colour and shine of your floor. Does not leave any residues. Specially designed for regular maintenance, this product does not damage the varnish coating, even if used in concentrated form, because of its gentle alkalic action.

Polish

Water repellent and protective maintenance product for varnished parquet, wood, bamboo and cork floors.

For regular maintenance of varnished parquet, wood, bamboo and cork floors. Restores the floor's original appearance and extends the life of your varnish, if used regularly. Available for matt and satin varnishes.

- Available in **satin** or **matt**;
- The parquet stays attractive for longer;
- Increased wear resistance;
- Water repellent and stain resistant.

Tip: For good lasting results, use the product every 4 - 6 weeks.

Single layer matt hardening oil, with high covering power, made from natural oils. For all types of parquet, wooden floors and other interior and exterior woodwork.

DevoNatural High Solid Oil is also suitable for floors in business premises and heavily used residential floors. The product is easy to apply and penetrates fully in to the open pores in the wood. **DevoNatural High Solid Oil** can be applied to all types of wood. Indoor use: parquet, wooden and cork floors, furniture, wood partitions, etc. This product is water resistant and also suitable for parquet floors in bathrooms. Outdoor use: external woodwork garden furniture, patios, etc. Also suitable for exotic woods, such as teak, etc.

- Ready to use single layer system;
- With UV filter and anti-yellowing;
- High solid particle content;
- For indoor and outdoor use;
- Also suitable for exotic wood;
- Highly moisture resistant;
- Matt or satin finish;
- Seamless application and finish.

High Solid Oil

"Colour and protect" with a single coat for each parquet floor!

The natural appearance of an oiled parquet floor catches everyone's eye.

Its contemporary colours, easy application and the short time that it takes until the treated surface can be used again make **DevoNatural High Solid Oil** the best product in every way!

Because of the product's high solid content and unique molecular structure, it is sufficient to apply a single layer to the floor. Moreover, it would serve no purpose to apply an extra layer, as the wood will reject any further product after it has become saturated. Adding a finish to your parquet floor can therefore be a very quick task and will only take a small amount of oil per m²!

Adding **DevoNatural Extra Hardener** means that you can use your floor after only 12 hours and further reinforces the wear resistance of the oil coating.

Silk white

Pure

Chalk white

Colourless

Agate grey

Weathered oak

Vison grey

Ceruse black

Tip: Adding **DevoNatural Extra Hardener** to **DevoNatural High Solid Oil**, will further improve wear resistance and reduce drying time!

Devo[®]
Natural

Prepolymer component for making DevoNatural High Solid Oil harden faster and more stain resistant

When added to **DevoNatural High Solid Oil**, **DevoNatural Extra Hardener** triggers the oxidative drying process and makes the product dry more fully and rapidly. Wooden floors treated with **DevoNatural High Solid Oil + Extra Hardener** can usually be used and walked on after only 12 hours. This makes this combination extremely suitable for finishing wooden floors in construction projects, public buildings, hotels/restaurants, function rooms, industrial finishing companies, etc., especially if an oil is needed that is suitable for heavy use.

- Fully dry and can be walked on after 12 hours;
- Increased wear resistance;
- Increased stain resistance;
- Increased chemical resistance, in compliance with DIN68861;
- Can be applied indoors and outdoors;
- Highly moisture resistant;
- Seamless application and finish.

Devo[®]
Natural

Extra Hardener

Special properties: The active substances in **DevoNatural Extra Hardener** have special properties based on DCC technology (Dual Cure Chemistry). **DevoNatural Extra Hardener** produces a chemical reaction with reactive groups found in **DevoNatural High Solid Oil**, which causes it to harden by means of an oxidative and chemical/ hygroreactive process. When modified using **Extra Hardener**, **DevoNatural High Solid Oil** has the powerful properties of a bi-component oil, but maintains the positive properties of a physically hardening single component oil!

"Maintenance products" for DevoNatural High Solid Oil

Decide for yourself how dense you would like the colour of your floor to be!

DevoNatural Wood Soap enables you to clean and nourish your parquet floor. It also keeps on protecting your floor so that it keeps its colour.

High Solid Oil Renewer and **Intensive Cleaner** make it possible for you to remove small marks and stains.

By using DevoNatural maintenance products, you will be able to enjoy your parquet floor for even longer - and without having to sand it again!

Please refer to the maintenance sheet for parquet floors treated with **DevoNatural High Solid Oil**.

- If you have used **DevoNatural High Solid Oil** to finish your parquet floor: This means that you opted for a finish that preserves the natural appearance and feel of your wooden floor! Floors treated in this way are fully protected against penetration of moisture and grime. In order to continue protecting your floor, you will need to regularly maintain your parquet with **DevoNatural Wood Soap**!

Wood Soap

Cleaning and nourishing neutral soap for oiled and untreated wooden floors.

Cleaning and nourishing natural soap for parquet and wooden floors. This soapy solution can also be applied as a finish treatment for floors made of woods, such as spruce/pine, oak, etc. (test before using on tropical woods).

- **Colours :** Colourless, white or grey.

Conseil : In order to help prevent your parquet from losing its colour, you can alternate between using **DevoNatural Wood Soap Clear** and **DevoNatural Wood Soap White**. This white soap adds a subtle white colour. In order to prevent the floor from becoming excessively white after repeated use, alternate with a colourless soap. Maintaining your parquet floor will also help you to influence its colour.

Intensive Cleaner

Powerful cleaner for removing old layers of soap, polish and grease from wooden floors, including tropical and heavily soiled wood.

DevoNatural Intensive Cleaner must be used before applying a parquet oil, oil renewer or new soap finish. Only use this product on water resistant parquet with a minimum thickness of 14 mm, due to the risk of swelling and warping.

- As a pre-cleaner for all types of parquet finish;
- Also removes polymer films and polishes!

Special characteristics: Over 90% bio-degradable.

High Solid Oil Renewer

Natural colourless or coloured liquid maintenance oil for renewing or repairing small areas of existing oil layers.

For major maintenance (yearly or every two years) and renewing parquet and wooden floors, furniture, doors, etc. treated with **DevoNatural High Solid Oil**.

Also suitable for removing localised stains or repairing damage.

- **Colours :** Colourless, chalk white and viron grey;
- Low consumption: $\pm 70 \text{ m}^2/\text{litre}$
- Easy to apply.

Diluent

Synthetic oil diluent and cleaning liquid.

DevoNatural Diluent is a synthetic oil diluent that can be used to dilute **DevoNatural High Solid Oil** and for manually degreasing wooden, cork and tiled floors, as well as ceilings, furniture, etc.

The product is also suitable for cleaning tools, mops, brushes, buckets used to hold the product, etc.

Traditional solid wax, made from high quality natural waxes, such as beeswax, carnauba and candelilla wax.

DevoNatural Solid Wax protects, nourishes and can be used for regular maintenance of wooden floors, furniture, beams, waxed doors, natural stone, rustic tiles, Burgundy stone, etc.

- Does not alter the colour of natural stone;
- Very workable at room temperature (paste-like product);
- Easy to apply without any seams;
- Lasting shine effect;
- Can be applied mechanically or by hand.

Solid Wax

“Waxing your parquet floor”

The old-fashioned look of a beautiful, natural and deep shine...

Our great-grandmothers used wax with pride. To this very day, it has lost none of its charm of yesteryear. Because it is based on natural products, such as Carnauba, Candelilla and raw beeswax, **DevoNatural Solid Wax** provides a deep natural shine and has a pleasant odour...

It is also perfect for antique parquet and floors with motifs. **DevoNatural Liquid Wax** can also be used to clean your waxed floors.

Liquid Wax

Liquid cleaning and maintenance wax, made from high quality natural waxes, such as natural beeswax, carnauba and candelilla wax. For parquet, wooden and natural stone floors.

This product cleans, protects and nourishes wooden floors, furniture, beams, waxed doors, natural stone, rustic tiles, Burgundy stone, etc.

- Does not alter the colour of natural stone;
- Dissolves old layers of dirty wax;
- Adds a new depth of colour to old waxed floorboards;
- Easy to apply without any seams;
- Can be applied mechanically or by hand.

Highly nourishing, cleaning and protective soap for untreated or oiled wooden and porous natural stone floors

Cleaning and nourishing natural soap for parquet and oiled wooden floors. This soapy solution can also be applied as a finish treatment for floors made of woods, such as spruce/pine, oak, etc. (test before using on tropical woods). Also suitable for maintaining porous/absorbant natural stone floors.

- **DevoNatural Soap** maintains and cleans your floor without leaving traces or a film;
- Suitable for indoor and outdoor use;
- Adds a natural look;
- Regular use reinforces your floor's shine and makes it darker in colour.

Soap

“Soaping your parquet floor”

Give your wood a Scandinavian touch.

Based on an idea from the Scandinavian countries, people now also soap their (resinous wood) floors in other parts of the world.

With **DevoNatural Soap**, your resinous wood floor will take on a distinctive Scandinavian shine! Without any yellowing, without build-up effect, and free from products that harm the environment...

Also suitable for maintaining **stone floors** !

Devo
Natural

Powerful oxalic acid-based cleaner that restores the original colour of weathered wood

Restore the original shine in hardwood that has become grey, due to prolonged exposure to the weather, by using **DevoNatural Outdoor Woodcleaner**.

Hardwood can therefore be restored to its original colour. Ideal for annual cleaning of decking, hardwood garden furniture, etc.

- Gives new life to your hardwood decking, garden furniture, etc. Removes the greyish colour of wood;
- Effective oxalic acid-based product.

Outdoor Woodcleaner

“Refresh and protect exterior woodwork”

Revitalise your exterior woodwork!

Would you like to change the grey appearance and remove green marks from your external woodwork, in order to restore its original colour? **DevoNatural Outdoor Woodcleaner** is easy to apply and cleans weathered exterior woodwork. The product combats all kinds of external pollution, but is environment-friendly.

After using this product, you are advised to apply **DevoNatural High Solid Oil**, in order to protect your exterior woodwork.

Tropical hardwoods become tarnished fairly quickly. If you want to give them optimal protection and in order to maintain their original colour, it is first recommended that you give them a deep clean.

Just like terraces constructed using other materials, wood terraces are affected by wear, moss, etc. For the deep cleaning of tarnished and weathered wood, use **DevoNatural Outdoor Woodcleaner**. **DevoNatural Intensive Cleaner** is ideal for removing grease and dirt.

If necessary, sand lightly and/or scour with a single-brush machine + black pad +

- **DevoNatural Outdoor Woodcleaner** - intensive wood cleaner. To be applied prior to **Devo Natural High Solid Oil** on garden furniture, terrace planks, parquet floors or other wood floors that are tarnished or worn.
- **DevoNatural Intensive Cleaner** - a powerful cleaner that removes layers of soap and degreases very worn floors. To be applied prior to parquet oil or oil renewer.

After drying, treat with **DevoNatural High Solid Oil**, which “Restores colours and protects” with a single coat of oil!
